Vaniyambadi, Tamil Nadu, India

SUMMARY

2nd-year BCA (AI & ML) student at VIT Vellore with strong foundation in Java development, database systems, and software engineering concepts. Experienced in building real-world Java applications with MySQL and JDBC, implementing secure authentication and full CRUD operations. Passionate about developing reliable software systems and actively seeking internship opportunities to gain hands-on industry exposure.

EDUCATION

Vellore Institute of Technology (VIT) <i>Bachelor of Computer Applications (AI & ML)</i> – CGPA: 9.10	Vellore, Tamil Nadu July 2024 – July 2027
Islamiah Boys Higher Secondary School <i>Higher Secondary Certificate (Maths & Computer Science)</i> – 12th Grade: 85.5% – 10th Grade: 79%	Vaniyambadi, Tamil Nadu June 2022 – Mar 2024

EXPERIENCE

Video Editor <i>Wisme AI</i> – Created and edited engaging video content for an AI-powered platform – Collaborated with cross-functional teams to enhance digital presence – Delivered professional-quality videos aligned with branding goals	Remote September 2025 – Present
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, C , HTML , CSS , Javascript
Databases: MySQL , PL/SQL (Local & Global Hosting)
Core Concepts: OOP, Data Structures & Algorithms, CRUD Operations , Computer Networks , Operating System , Artificial Intelligence , Machine Learning
Tools: VS Code, Git , Github
Languages: English, Tamil, Hindi, Urdu , Spanish

PROJECTS

Online Voting System (Java Course Project) <i>Java — MySQL — JDBC — Swing</i> – Developed a complete Java-based desktop application implementing an Online Voting System – Implemented secure Voter and Admin authentication with database validation – Designed voter registration and vote casting logic with prevention of multiple voting – Built an Admin Dashboard to manage voters and candidates – Implemented full CRUD operations: Create (Add voters and candidates), Read (View voters, candidates, results), Update (Update vote records), Delete (Remove voters and candidates) – Connected the application to a globally hosted MySQL database using JDBC	3rd Semester
